David Adindu

PROFILE

My passion for problem solving and software development came from finding joy in being able to analyse technical problems and then turning that analysis into an equitable solution. Communicating with others and working in teams poses no threat to me and I enjoy socializing even while in the process of working. My main goal is to gain industry experience and strengthen my technical skills as well as my programming skills.

Currently pursuing a Bachelor's Degree in Computer Science at Technological University Dublin, I am on a path to become an industry standard software developer. Curiosity is my greatest strength, I have a desire to learn as many new things as quickly as possible. I have strong programming skills with experience using Python, Java and MySql Database.

PROGRAMMING EXPERIENCE

- ❏ Python
- ❏ Java
- ❏ Javascript (MERN Stack)
- ❏ MySQL & NoSQL (MongoDB)

EDUCATION

Technological University Dublin (Blanchardstown) - Bachelors of Science (Computing)

Relevant Coursework: Fundamentals of Programming, Object Oriented Programming and Design, Database Fundamentals, Algorithmic Problem-Solving
